## Sports software

For use in sports environments in conjunction with LED screens

### Capabilities

- Content can be displayed full-screen or scaled to fit into areas of any size and shape on the display.
- Content can be mixed as required, including score, sponsor's logos, live betting information, archive footage, live action.
- Display can be customised to suit all requirements.
- Display mode can be reconfigured to suit all sporting applications such as football, rugby, cricket, basketball, ice hockey, American football and baseball at the touch of a button.
- Accepts most formats including:

#### Multimedia files

any PC compatible multimedia file, JPEG, AVI, MPEG 2, MPEG 4, DivX etc. Limited only by the capabilities of the PC and software codecs installed.

#### Animation files

Adobe Flash files.

#### Live video

SDI, component, composite etc. Limited only by the capabilities of the video capture card.

#### Streaming video

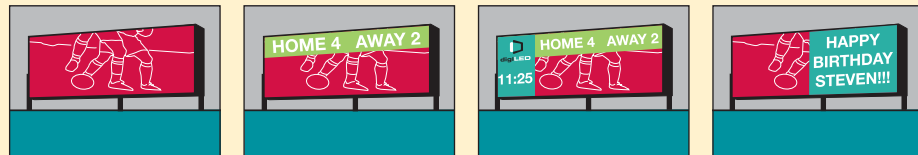

Digital video from an IPTV system.

#### Live internet data

From any XML or RSS feed on the internet or intranets.

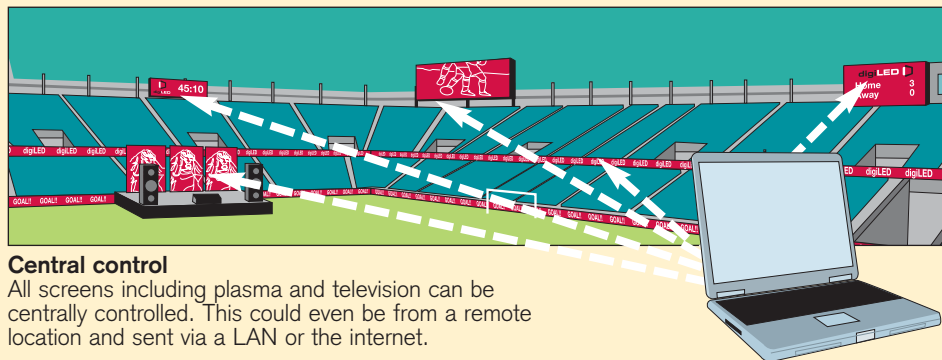

#### Data

Dynamically linked from an Excel spreadsheet or SQL database.

#### On screen flexibility

Flexible screen content. Content can be displayed full-screen or scaled to fit specific areas.

#### Central control

All screens including plasma and television can be centrally controlled. This could even be from a remote location and sent via a LAN or the internet.
