

# C-TEK

INDOOR & OUTDOOR  
CURVING CORNERS  
LIGHTWEIGHT  
ONE MAN INSTALLATION  
FAST IN-SITU SERVICING

## Quick Maintenance

For indoor models, the magnetic tile design enables quick front or rear service. For outdoor models, 4 screws are used per tile, plus magnets to balance the ease of use, flatness and safety. Two handles to remove the power box, again one of the quickest features in the industry.

- Simple and Easy Installation
- Memory on Module
- Super Lightweight
- Seamless Curving
- Corner Panel Option
- One Man Rig and Derig

## digiLED Application Experts

- Site surveys, install design & visuals
- Procurement / installation of screen surface & structures
- System commissioning & ongoing maintenance / warranty

## Memory on module

The memory on module function is integrated into the design on all models of C-TEK, for easy configuration when replacing tiles.

## Super lightweight

It's not about being the lightest in the world. It's about being as light as possible without a sacrifice in performance. At merely 12kg per panel for outdoor 500x1000mm, C-TEK outdoor will achieve up to 5,000 nits brightness, with superior flatness.

## Seamless curve

A perfect side locking system should deliver a great combination of seamless connection, good handling experience at reasonable cost. digiLED C-TEK has two sets of curvable side locks to ensure the solid connection. The accurate machining delivers a seamless connection up to 5 degrees convex at 2.9mm, which has always been a challenge in the industry.

## One man rig and derig

One man install with quickest ever top locks. For either stacking or hanging, with simply a click to self-lock the two cabinets. There's clear click feel as well as a visible sign designed to indicate the lock status and avoid in-operation. Handles are then used to tighten the connection and eliminate gaps.

The locks are easy enough even for one man to uninstall. The 8-12kg panel provides an acceptable weight for one handed manipulation, leaving the other hand free to release locks.

## C-TEK FEATURES

### Corners

A real seamless corner with no visual dark lines even from close up.

### Floor

With very simple additional accessories, the standard cabinet can be adapted to use as an LED floor.

### Modular design

With a highly standardised modular design, the different models of C-TEK share the same cabinet frame, power box, easy to manage spares and servicing for interchangeability between different models. Identical module on each model to suit any position on the cabinet, no confusion, no hassle..

### First class flatness

The cabinet frame is produced by a leading supplier for die-cast frames, well known in the industry for reliable quality control.

An experienced manufacturer for module housing, with proven quality in the market. Seeing is believing!
