## digiLED displays the greatest show on turf

In conjunction with partners GoVision, digiLED provided 15 digiLED Toura6 screens at the 2016 Ryder Cup, held at Hazeltine National Golf Club, Minnesota – more displays than at any previous PGA Tour event in history.

Along with Team USA's historic success over a battling European side, digiLED surpassed the record for the most screens ever provided for a professional golf event – 15 displays were temporarily deployed across the Hazeltine National golf course complex to deliver action replay and updated scoring presentation for the sport's premier team competition.

digiLED Toura6 tiles provide high resolution displays and offer stunning clarity of image, perfect for use both indoors and outdoors as deployed by Hazeltine NGC on both the golf course and inside the media centre.

The ultra-lightweight (25.55kg per sqm) digiLED Toura6 comprises solid black-faced panels. Fast-rig mechanics and a built-in ladder system ensure ease of installation and service access, too.

Graham Burgess, digiLED CEO said: "It was a privilege to be a part of such a prestigious event that captivates millions of people on both sides of the pond. With 15 screens dotted about the course, it was a big factor in generating atmosphere and energy, as well as providing score information to the players and fans alike."
